关于 GPU 服务器的账号申请与使用的手册

一、 申请账号

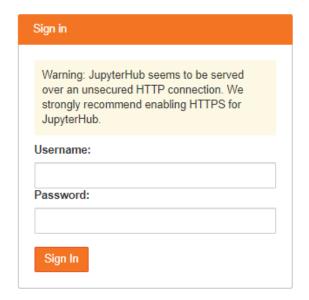

注意: 因为需要用户自己提供拟注册账号的用户名和密码,所以为了避免可能的用户名重复以及密码太短等问题导致的注册失败,请尽量【**不要**】提供过于简单的用户名,也【**不要**】提供低于八位的短密码。

二、登陆账号

申请账号成功后,在浏览器打开以下网址:

http://jupyterhub.vickytse.cn/hub/login

在以下界面输入用户名和密码进行登陆:

三、 启动服务器

点击登陆后,在「 Server Options 」界面选择「 Tensorflow and Pytorch [GPU] 」,点击「 Start 」进入,如下图所示:

Server Options

0	Minimal Environment [CPU] Python.
0	Datascience Environment [CPU] Python, R, and Julia.
0	Spark Environment [CPU] The Jupyter Stacks spark image!
0	Tensorflow and Pytorch [CPU] Tensorflow and Pytorch
0	Tensorflow 1.15 and Pytorch [GPU] Tensorflow 1.15 and Pytorch
•	Tensorflow and Pytorch [GPU] Tensorflow and Pytorch
0	CUDA Devel Environment [GPU] Tensorflow and Pytorch Framework, and NVIDIA CUDA Toolkit Development Files.
0	Tools Notebook Include java8, gcc, curl, etc.

等待加载完成:

Your server is starting up.

You will be redirected automatically when it's ready for you.

2020-10-09 08:56:15.197930+00:00 [Normal] Successfully assigned jupyterhub/jupyter-dhuang2012 to 11.11.11.40

2020-10-09 08:55:36+00:00 [Normal] Started container block-cloud-metadata

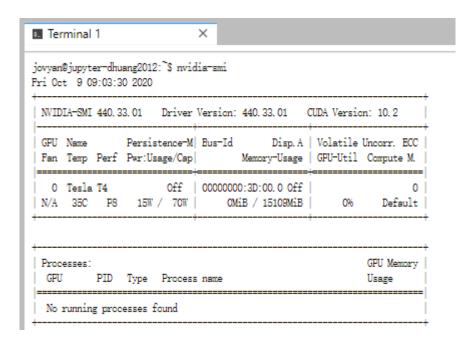

2020-10-09 08:56:15.197930+00:00 [Normal] Successfully assigned jupyterhub/jupyter-dhuang2012 to 11.11.11.40

2020-10-09 08:55:37+00:00 [Normal] Successfully assigned jupyterhub/jupyter-dhuang2012 to 11.11.11.40

在「Launcher」页面选择自己的操作类型,这里选择「Terminal」

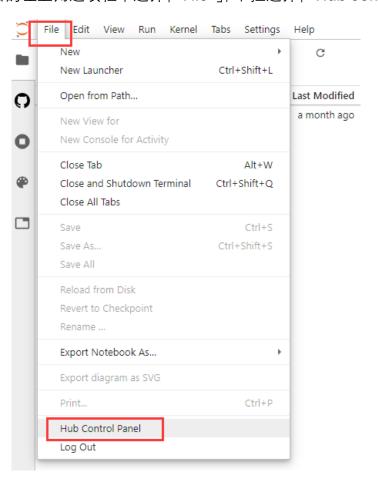

在命令行输入命令「 nvidia-smi 」验证当前环境:

四、释放资源

在完成实验后,须手动释放计算资源。

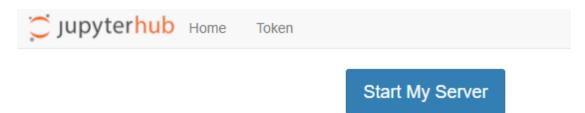

在页面的左上角选项栏中选择「File」,下拉选择「Hub Control Panel」。

在弹出的页面点击「 Stop My Server 」以释放资源。

注意: 在点击「Stop My Server 」后可能出现释放资源失败的情况,为了确保已经完成资源的释放,请多次【刷新】当前页面,当页面【没有】「Stop My Server 」按钮表示资源已经释放,如下图所示。

计算资源有限,请务必确保完成资源释放操作!!!
